

Everything your office runs on, made in **Bharat**.

An operating system, an office suite, email and
round-the-clock security. One company, one
account, rupee pricing.

THE OPERATING SYSTEM

A free desktop, made in **Bharat**.

Fast, secure and simple. Download it free, and add Pro or Server when you want support.

Mail, Calendar, Contacts, Drive

Built in, signed in with one Nubo account.

Secure by design

Built on Ubuntu 26.04 LTS, with regular security updates.

Nubo Setup

A guided set-up for your account and apps.

Desktop and Server

One base for laptops, offices and servers.

COMMUNITY

Free

The full desktop and security updates.

NUBO
PRO

₹499

a year
or ₹2,999
once

Priority updates, email support, Nubo Setup help.

SERVER

₹9,999

a year

Nubo OS Server with priority updates and email support.

SERVER 24×7

₹49,999

a year

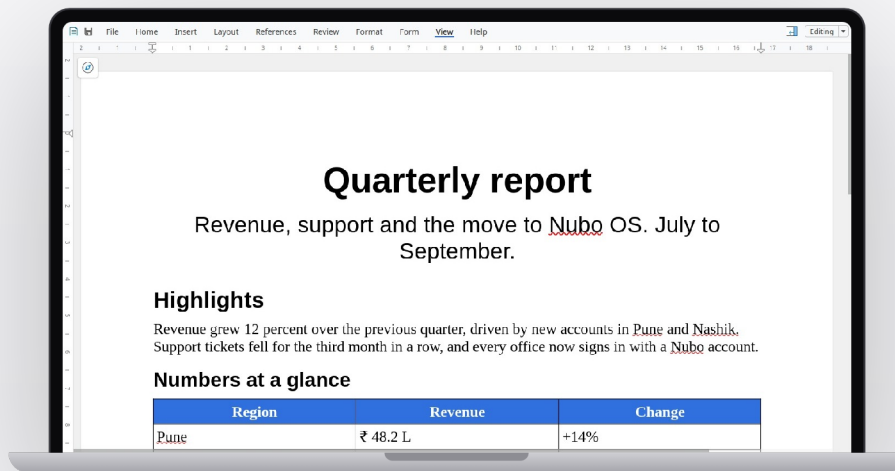

Server, plus 24×7 phone and chat support.

Prices per device (per server for Server plans), inclusive of GST.

THE OFFICE SUITE

Office, pay once.

Opens your Word, Excel and PowerPoint files, and works without internet.

Write

Documents, letters and reports.

Cells

Spreadsheets, budgets and accounts.

Present

Slides that look sharp.

Draw

Diagrams, posters and flowcharts.

NUBO OFFICE

₹2,499

once

or ₹499 a year

One plan, everything included. Online editing comes with Nubo Email.

BUNDLE: NUBO PRO + OFFICE

₹799

a year

or ₹3,999 once · save ₹1,499

The operating system and the office suite, together.

Prices per device, inclusive of GST.

MANAGED SECURITY

Every device, watched and protected.

On Nubo OS, Windows, macOS, Ubuntu and other Linux. Desktops and servers.

**Real-time threat detection**

Watched around the clock for attacks, odd logins and changed files.

**Antivirus**

Nubo Shield on Linux and macOS. Microsoft Defender kept on and current on Windows.

**Patching**

Missing updates found and applied on your schedule, with a report.

**Backup**

Encrypted backups with versions, to restore from before an attack.

**Investigate and fix remotely**

We find the cause, isolate the device and fix it, with a session log.

**Dashboard and reports**

One view of devices and alerts, a monthly report, and PCI, HIPAA, NIST and GDPR reports.
